

Sanket Shendge

Software Engineer | Full Stack | AI/ML Integration

+91-9175744363 | sanketshendge21052002@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Software Engineer with 1.5 years of experience at Accenture designing and delivering scalable software solutions across the full SDLC. Proficient in Python, React.js, and cloud-native architectures (AWS, GCP, Azure) with hands-on experience in LLM integration, RAG pipelines, and real-time systems. Triple cloud-certified with a peer-reviewed publication in AI-driven healthcare systems. MMA Award recipient for Client Value Creation. Strong foundation in OOP, SOLID principles, RESTful API design, microservices, and secure coding practices.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C#, Java, C/C++, SQL,

Frontend: React.js, Next.js, Redux, React Three Fiber, HTML5, CSS3

Backend & APIs: FastAPI, ASP.NET Razor, RESTful APIs, Microservices, WebSocket, Node.js

AI / ML: LLM Integration (LLaMA 3.2), RAG Pipeline, Prompt Engineering, NLP, Machine Learning

Databases: MongoDB, MySQL, PostgreSQL, Relational DB Design

Cloud & DevOps: AWS, GCP, Azure, Terraform, CI/CD Pipelines, Docker, Git, Azure Policies

Practices: OOP, SOLID Principles, WCAG

EXPERIENCE

Associate Software Engineer · Accenture, Pune

Sept 2024 – Present

Award: MMA — Core Values: Client Value Creation (Sept 2025): Recognised for resolving 50+ WCAG accessibility violations across 8+ screens on an enterprise client application, achieving full compliance and delivering measurable improvement in the client's digital accessibility standards.

- Developed and remediated enterprise B2B and B2C web applications built on React.js, C#, and ASP.NET Razor resolving 50+ accessibility violations across 12+ screens to achieve full WCAG compliance, maintaining secure coding standards and contributing to peer code reviews across the delivery team.
Diagnosed and resolved a recurring dynamic content deployment failure on Azure — scripts failing multiple times weekly due to HTML injection timing issues in the React.js frontend — implementing a Mutation Observer solution that eliminated deployment failures completely and stabilised the release pipeline.
- Collaborated within a 6-member team to engineer an AI-powered predictive maintenance platform for industrial fleets using FastAPI microservices, LLaMA 3.2, and a dual RAG pipeline — delivering real-time WebSocket diagnostics in under 2.5 minutes, outperforming competing batch log-processing approaches at an internal hackathon.
- Prototyped an AR-powered industrial fleet management system for mining sites using Next.js and React Three Fiber, integrating an LLM-driven safety shutdown sequencer that reduced manual fleet coordination time from 30 minutes to under 5 minutes for blast zone and failure scenarios.

Software Developer Intern · CodeClause, Remote

Feb 2023 – May 2023

- Designed and delivered a full-stack internal Employee Management System using Python and JavaScript — building end-to-end REST API endpoints, frontend interfaces, and backend logic, handing off a complete production-ready build within a 3-month internship.

PROJECTS

Integrated Healthcare Monitoring Device with ML Assistance

Oct 2023 – Apr 2024

- Designed and built a real-time IoT patient monitoring device integrating ML algorithms for early disease detection — merging hardware sensor data with AI diagnostics across multiple vital signs, culminating in a peer-reviewed publication in IJNRD (Nov 2023) on NLP-driven chatbots, IoT, and AWS cloud infrastructure.

PUBLICATION

Revolutionizing Healthcare Delivery: A Comprehensive Review of Chatbot-enabled Systems Integrating Real-time Sensor Data and Cloud Computing

Co-authored a review paper on a next-gen healthcare model combining chatbot technology, real-time IoT sensor data, and AWS cloud infrastructure. Developed a framework for providing personalized medical assistance using NLP-driven chatbots, real-time health monitoring via IoT devices, and secure data handling through cloud computing.

Key Technologies: NLP, IoT, AWS Cloud, ECC, Time Series Analysis

Authors: Sanket Shendge, Atharva Thube, Prerana Vichare, Jyoti Vishwakarma | **Journal Name:** INTERNATIONAL JOURNAL OF NOVEL RESEARCH AND DEVELOPMENT (IJNRD) | **Volume, Issue and Pages:** Vol.8 issue 11 November 2023 | **Publisher:** INTERNATIONAL JOURNAL OF NOVEL RESEARCH AND DEVELOPMENT (IJNRD)

EDUCATION

B.E. Computer Engineering · A.I.S.S.M.S College of Engineering (SPPU), Pune

Jun 2024

CGPA: 8.75 / 10

Diploma in Computer Engineering · Cusrow Wadia Institute of Technology

Aug 2021

Score: 94.82%

CERTIFICATIONS

AWS Certified Cloud Practitioner (2024–2027) | Google Certified Associate Cloud Engineer (2025–2028) | Microsoft Certified: Azure AI Fundamentals (2025) | Goethe-Zertifikat A2 (German)
